WORK EXPERIENCE

Department of Information and Communications Technology - CALABARZON

Calamba, Laguna

Full-Stack Developer (Intern)

March 2026 – May 2026

- Architected the core database schema for an internal web app, covering **90%** of all data models through Flask-Migrate (Alembic) with PostgreSQL, serving as the structural foundation the team built upon throughout development.
- Developed **95%** of the admin panel for an internal web application using Flask (Python), implementing JWT-based authentication, full CRUD REST APIs, and interactive dashboards with charts and data tables for enrollment, training, and complaint management; also contributed REST API endpoints to the staff panel covering courses, trainings, and participant registrations in close coordination with fellow interns.
- Conducted manual QA testing on participant and staff panels and led debugging efforts for the admin panel, resolving **80%** of reported issues and supporting colleagues in identifying and addressing cross-panel defects throughout development.

CertiCode

Remote

Full-Stack Developer (Intern)

August 2026 – Present

- Architected and built a full-stack restaurant reservation system, implementing HttpOnly JWTs and background Queue Workers for email dispatching.
- Reverse-engineering a full-stack food delivery platform, resolving critical rendering/route-guard failures, fixing N+1 database query bottlenecks, and automating CI/CD deployment workflows.

PROJECTS

Yakuza Platform – Discord Staff Portal with Bot Integration

July 2026

Commission Project | Solo Developer | Laravel, Laracord, PostgreSQL

- Built a full-stack Discord community management system featuring Discord OAuth authentication, role-based access control synced with Discord's API, and a staff web portal for managing announcements.
- Developed a Discord bot with slash command support, integrated with the web portal and staff management system through a shared PostgreSQL database.

KidDoReads – A Web-Based English Literacy Learning Platform

January 2026

Capstone Project | Lead Developer (Full-Stack) | (HTML, CSS, JavaScript), Flask Python, MySQL, Redis

- Led full development and deployment of a thesis-based English literacy platform for Grade 3 students across a **3-person team**, overseeing task distribution, code reviews, and frontend-backend integration across four literacy skills: pronunciation, word recognition, reading comprehension, and phonemic awareness.
- Integrated text-to-speech for the students, and a chatbot for an English teacher via OpenAI and Speechgen.io and independently deployed the application on DigitalOcean.
- Validated through a pretest-posttest study (N=64, control and experimental groups), with the experimental group achieving an **84.8%** pronunciation improvement rate versus **32.3%** in the control group ($p < .001$, effect size $r = 0.80$).

TrackHub – A Mobile Platform for Lost and Found Items (<https://github.com/FumI4096/TrackHub>)

November 2024

Mobile Programming II Project | Solo Developer | Java, Clarifai, MySQL

- Built a mobile lost-and-found platform where users can post and browse lost or found items, structured similarly to a social media feed.
- Integrated Clarifai's AI image moderation to automatically filter inappropriate content (nudity, violence) from user-submitted posts.

VOLUNTEERING

Vice President, School of Computer Studies and Technology Council

August 2024 – August 2025

- Led and executed academic and school-related activities for the College of Computer Studies, demonstrating leadership and organizational skills across multiple student-facing initiatives.

ACADEMIC ENGAGEMENT

Student

2022 – 2026

- Secured 1st place two consecutive years in the departmental Python coding competition, demonstrating consistent programming proficiency.
- Earned Rector's List recognition twice as of first semesters of A.Y. 2024-2025 and A.Y. 2025-2026.

EDUCATION

Colegio de San Juan de Letran Calamba

2022 – 2026

BS Information Technology

Calamba, Laguna

SKILLS

• JavaScript • HTML • CSS • PHP • Python • Java • SQL • ReactJS • TailwindCSS • Flask • Laravel • NodeJS • PostgreSQL • MySQL • SQLite • MSSQL • Git • Figma • Postman • Android Studio • Visual Studio • Antigravity • Docker • System Design and Architecture

CERTIFICATIONS

- IT Specialist in Databases — Certiport (2024)
- IT Specialist in Java — Certiport (2025)
- IT Specialist in HTML5 in Application Development — Certiport (2024)
- System Design Masterclass 2026 – Udemy (2026)
